

Oslo SUDS conference 2019

Prof. Lars J. Hem, Norwegian water association

Urban drainage challenges

Climate change effects; higher rain intensity, most precipitation records are from the last years
Growing cities with more dense surfaces

Urban drainage

- A challenge (storm water)
- An environmental issue (CSO)
- A resource (rain water harvesting)
- An opportunity (blue-green cities)
- SUDS may be part of the answer for all cases
