

# SELF-EVALUATION REPORT OF TRAINING

|                  |   |
|------------------|---|
| Type             | Training  |
| Institution      | UNI, UNSA, UNMO, UoM, UNS, PWMC VV, NMBU  |
| Reporting date   | 16 June 2021  |
| Report author(s) | Milan Gocić, Slaviša Trajković, Emina Hadžić, Ammar Šarić, Mili Selimotić, Marko Čeček, Merima Šahinagić-Isović, Goran Sekulić, Ivana Čipranić, Maja Petrović, Igor Peško, Olivera Gavrilović, Zakhar Maletskiy |

## TRAINING DESCRIPTION

with special reference to goals and outcomes

|   |     |
|---|-----|
| Number of participants at the training  | 174 |
| Training description  |     |
| <p>The on-line training was organized under the frame of WP4 Implementation of developed master curricula and trainings and A4.2 Implementation of trainings for professionals in the water sector of the Erasmus+ CBHE KA2 project “Strengthening of master curricula in water resources management for the Western Balkans HEIs and stakeholders (SWARM)” (project number: 597888-EPP-1-2018-1-RS-EPPKA2-CBHE-JP). The training organizers were the following project partners: University of Nis (UNI), University of Sarajevo (UNSA), Dzemal Bijedic University of Mostar (UNMO), University of Montenegro (UoM), University of Novi Sad (UNS) and Public Water Management Company “Vode Vojvodine” (PWMC VV) in collaboration with the WP4 lead institution (Norwegian University of Life Sciences, NMBU). It was organized in the period of 8<sup>th</sup> to 10<sup>th</sup> June 2021, technically supported by the staff of the Dzemal Bijedic University of Mostar whose Microsoft Teams platform was used.</p> |     |

University of Nis

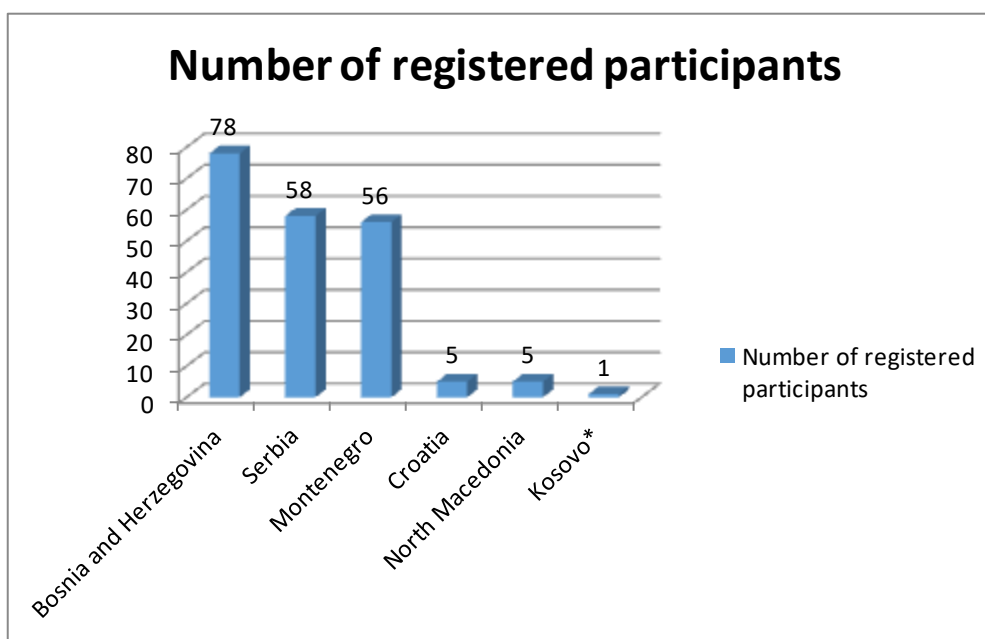

Strengthening of master curricula in water resources management  
for the Western Balkans HEIs and stakeholders

Before the training two organisational meetings were organised by the project coordinator from UNI, Milan Gocić, on 21st May 2021 and 07th June 2021. All participated institutions made the promotion and sent invitation letters to the future participants. For the participant registration, Google Form was created and used (presented in this report). According to Google Forms, in total 218 participants were registered. After checking if there are duplicate registration, 203 participants were registered.

The link to the registration form:

<https://docs.google.com/forms/d/1nNFihW3uPnaPlq48fPjr13rpDAjTUPQ709NhSmjlsvA/edit>.

Statistics related to the number of registered participants

As it can be seen, the registered participants are from the Western Balkan (WB) region and it can be concluded from the figure this on-line training is a good example of the regional cooperation that should be further strengthen.

For the purpose of the training, under activity A3.3 [Development of trainings' content and corresponding educational material](#) the Handbook for training in Water Resources Management (ISBN 978-86-81656-09-9) was developed in English and in the mother tongue of Western Balkan countries consisting of seven LLL courses (<http://www.swarm.ni.ac.rs/activities?id=53>):

1. Water management and climate change adaptation prepared by the University of Sarajevo,
2. Water – Scarce resource prepared by Technical College of Applied Sciences Urosevac with temporary seat in Leposavic,
3. Flood and drought risk management prepared by the University of Nis,
4. Managing the quality of stormwaters prepared by the University of Montenegro,
5. Wastewater treatment and reuse of treated wastewater prepared by the University of Novi Sad,

6. IT tools in the water resources management prepared by the University of Priština settled in Kosovska Mitrovica,
7. Innovation in the water sector – Model of managing a process of water supply network repair using fuzzy logic and fuzzy inference prepared by the Dzemal Bijedic University of Mostar.

All chapters (courses) have been reviewed by selected reviewers from the Programme Countries of the SWARM consortium.

In total 14 panelists presented materials related to the water resources management and their experience in this field.

### **First day – 08 June 2021**

Moderator: Ammar Šarić, University of Sarajevo

Speakers:

Milan Gocić, University of Nis

Slaviša Trajković, University of Nis

Emina Hadžić, University of Sarajevo

Mladen Milanović, University of Nis

The first day of the training started at 9.00.

Milan Gocić presented the SWARM project and the achieved results. He highlighted the necessity of this type of training in the Western Balkan region and presented the handbook prepared for this training including seven LLL courses. He also invited the participants to take part in future project activities especially the Symposium titled »Water resources management: new perspectives and innovative practices« which should be held in Novi Sad, Serbia from 23rd to 24th September 2021 with the wider aim to make a synergy between academic and non-academic sector in the field of water resources management and to promote achieved project results.

Slaviša Trajković presented the topic of EU water policy under the Water Framework Directive. He emphasizes the importance of the Water Framework Directive and its implementation in the Western Balkan countries. As a good example of its implementation, he talked about the River basin management plan of the Sava river.

Emina Hadžić presented the topic Water management and climate change adaptation. She talked about new approaches to water management such as reducing urban floods.

Milan Gocić presented the topic Water – scarce resource and talked about water governance, EU water policy and relevant directives, water challenges and future steps in the water sector. The key future challenge will be to start managing water as an economic commodity while ensuring that it is available to all in line with the Agenda 2030.

Mladen Milanović presented the topic of Flood and drought risk management. Natural disasters such as floods and droughts cannot be prevented and will continue to happen in the future.

Understanding the relationship between floods and droughts is important for effective sustainable water conservation and thus for flood and drought risk management. According to the legal regulations, flood risk management is performed by a management plan which ensures the reduction of harmful consequences for human health, the environment and the economy. The quality of the Plans depends on the quality of the preliminary risk assessment, the hazard map and the flood risk map. Successful drought risk management involves drought forecasting, monitoring, impact assessment and effective response.

The first day finished after the discussion section at 13.40.

### **Second day – 09 June 2021**

Moderator: Milan Gocić, University of Nis

Speakers:

Srđan Kovačević, University of Novi Sad

Ivana Ćipranić, University of Montenegro

Suada Sulejmanović, University of Sarajevo

Suad Špago, Dzemal Bijedic University of Mostar

The second day of the training started at 9.00.

Srđan Kovačević presented the topic of Wastewater treatment and reuse of treated wastewater. In the past decades, great attention has been paid to the need for cheaper, more sustainable and efficient wastewater treatment technologies based on the principles and technologies of environmental protection. Due to inconsistent national legislation across Europe and limited public awareness of the real risks and benefits, the reuse of treated wastewater is an expensive practice subject to distrust by the general public. Potential obstacles to the free movement of agricultural products irrigated with reused wastewater are an additional risk that discourages investment by potential investors. Recycling and resource reuse can help close the resource cycle loop, providing a viable alternative to exploiting source resources. The transition to a circular economy encourages and encourages more efficient water use and, combined with strong incentives for innovation, can improve the economy's ability to cope with the demands of a growing imbalance between water supply and demand.

Ivana Ćipranić presented the topic of Leakage in water supply systems. Obstacles to the efficient measures of water supply systems with losses:

- Insufficient awareness of this issue among people who operate water supply systems;
- Incorrect measured data;
- The goal of sustainable management of water supply systems is usually not related to the overall goals of sustainability, at the level of one country;
- Fear of a negative image leads to the display of false% about losses in the system;
- Corruption that can lead to inefficient projects, launched with the aim of reducing losses.

Suada Sulejmanović presented the topic of IT tools in water resources management. Roads play a very important role when natural disasters occur, it is necessary that the roads are passable and that they are allowed to move freely. Flood management and control play a key role in protecting

the population and their property. Although in most cases it is not possible to completely eliminate the risk of floods, efforts are focused on reducing and mitigating the damage caused by floods, through flood defense, evacuation and rescue measures and finally remediation of the consequences of floods. It is very important to know the type of risk, because the protection measures are not the same for high, medium and low risk. The methodology cannot guarantee with certainty the accuracy of the obtained results without additional recordings. The existence of updated geospatial databases is very important. For all types of risks, it is necessary to perform preventive, non-construction measures.

Suad Špago presented the topic Model of managing a process of water supply network repairing by using fuzzy logic and fuzzy inference. At this level of observability and degradation of the pipeline network, fault and loss information can be considered as a sufficient set of system condition information. To assess the state of the network - the rate of deterioration and risk, based on data on failures and losses, as well as cost-effectiveness measures, the application of fuzzy logic (Mamdani method) allows inaccurate and/or subjective qualifications to be used in the inference model. Linking fuzzy logical reasoning (Mamdani) to fuzzy decision theory (Bellman-Zadeh) when making decisions about renewal priorities, exactly introduces experiential knowledge into the model instead of scarce data.

The second day finished after the discussion section at 13.55.

### **Third day – 10 June 2021**

Moderator: Mili Selimotić, Dzemal Bijedic University of Mostar

Speakers:

Goran Sekulić, University of Montenegro

Slobodan Kolaković, University of Novi Sad

Dalila Ivanković, Dzemal Bijedic University of Mostar

Ratko Bajčetić, Public Water Management Company “Vode Vojvodine”

Jelena Vojvodić, Public Water Management Company “Vode Vojvodine”

Enes Šeperović, Ministry of Foreign Trade and Economic Relations of Bosnia and Herzegovina

The third day of the training started at 9.00.

Goran Sekulić presented the topic of Stormwater quality management. Quality control of stormwater can be achieved by various methods which solve this problem more or less efficiently. The quantity of pollution flushed from stormwater runoff depends on surface features, existing pollutants (highways, factories etc), as well as numerous hydrological and meteorological factors. The large spatial and temporal applicability of every parameter of ground runoff represents the issue in establishing simple rules and requirements regarding controlling and pollution decreasing appearing with atmospheric waters.

Slobodan Kolaković presented the topic Possibilities of application of new technologies in flood management on lowland rivers. This management model with some modifications can be applied to the entire Danube, so it is expected that the results of this work will enable the integration and creation of a single hydraulic model from the upper Danube (Germany) to Djerdap 1, which would

enable integrated flood management throughout the basin. This includes the adoption of a joint strategy, ie the development of a joint Flood Management Plan regardless of state borders. It is also necessary to define the criteria for selecting the locations of multi-purpose retentions, which would enable flood wave management.

Dalila Ivanković presented the topic of Water pollution and its causes. Since more than 60% of the water on Earth is groundwater, it passes through rocks and soils buying minerals, including calcium and magnesium. These two contaminants produce what is usually called "water hardness".

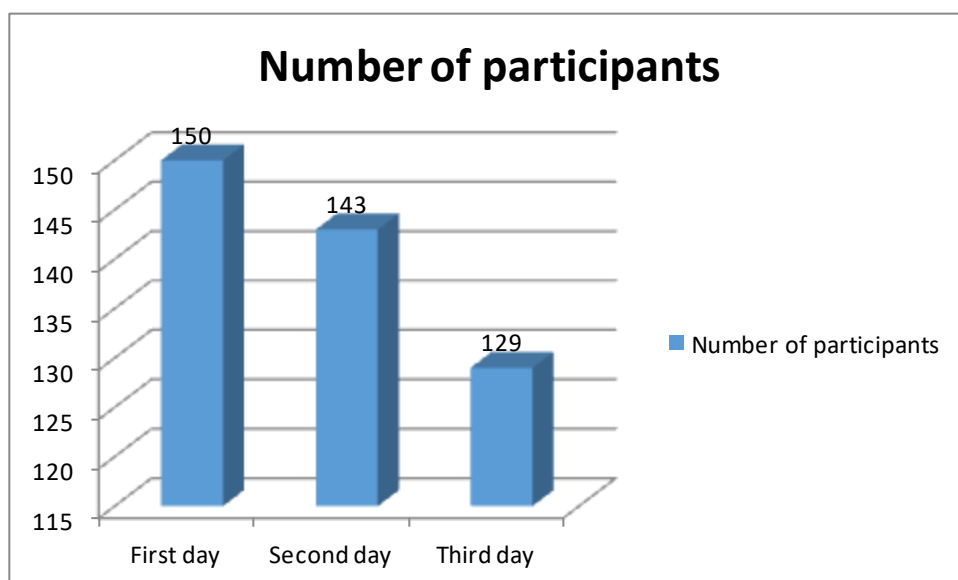

Ratko Bajčetić presented the topic Methods of rational water management planning. The setting of objective performance, followed by the identification of alternative solutions and the assessment of alternatives for the set criteria, form the core of rational planning.

Jelena Vojvodić presented the topic of Water management in Serbia. Integral water management (water management), in terms of the Law on Waters, is a set of measures and activities aimed at maintaining and improving the water regime, providing the required quantities of water of required quality for various purposes, water protection from pollution and protection from harmful effects of water. She highlighted that the Public Water Management Company "Vode Vojvodine" Novi Sad was established by the Assembly of AP Vojvodina by the Provincial Assembly Decision on the establishment of a public company for water management in the territory of AP Vojvodina.

Enes Šeperović presented the topic of Water management in Bosnia and Herzegovina. The action plan is one of the more successful examples in this area. It needs to be supplemented and awareness of mutual solidarity and prevention measures should be raised

The third day finished after the discussion section at 13.05.

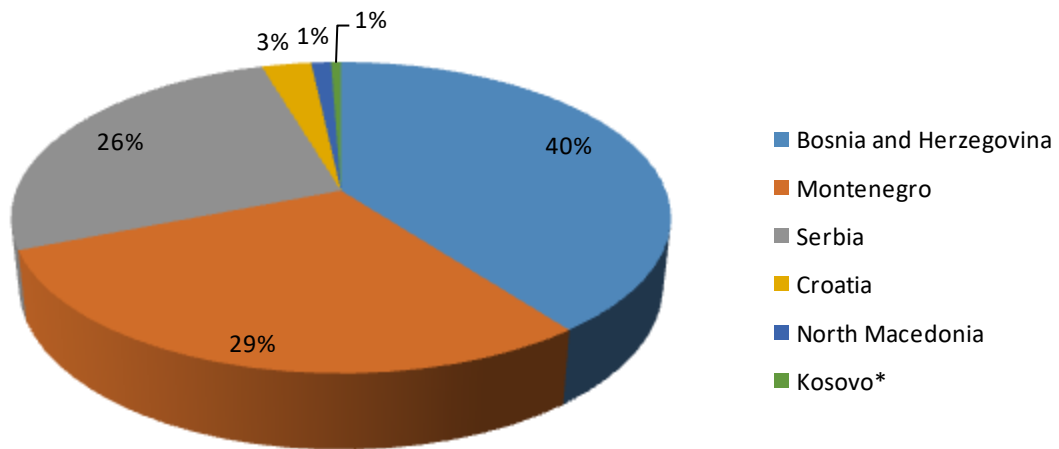

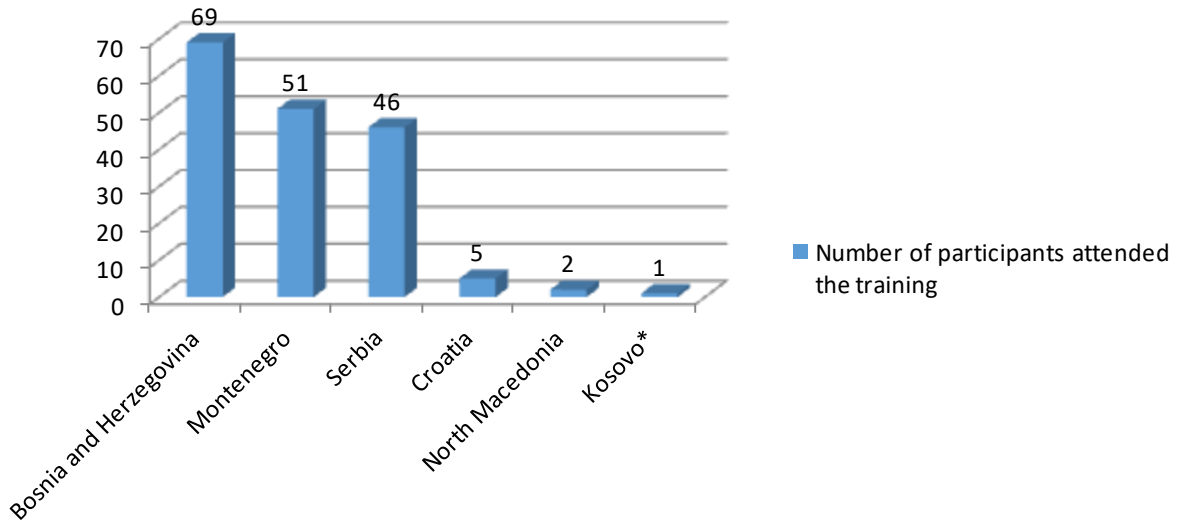

### Statistics of participation

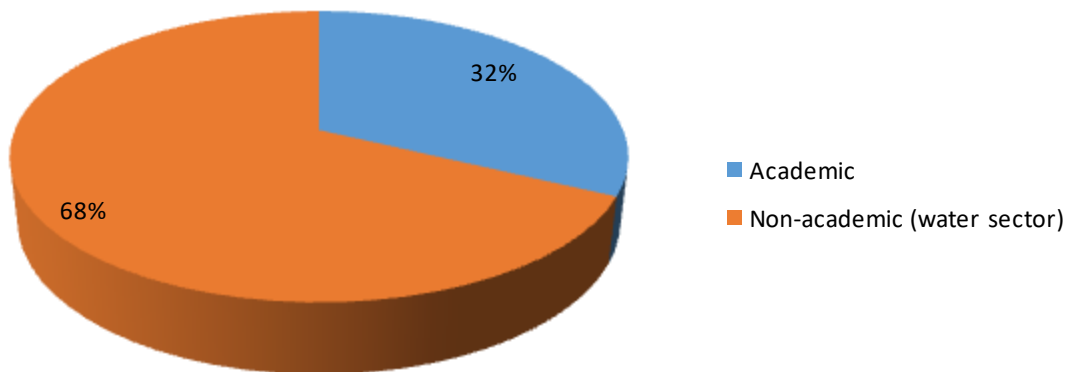

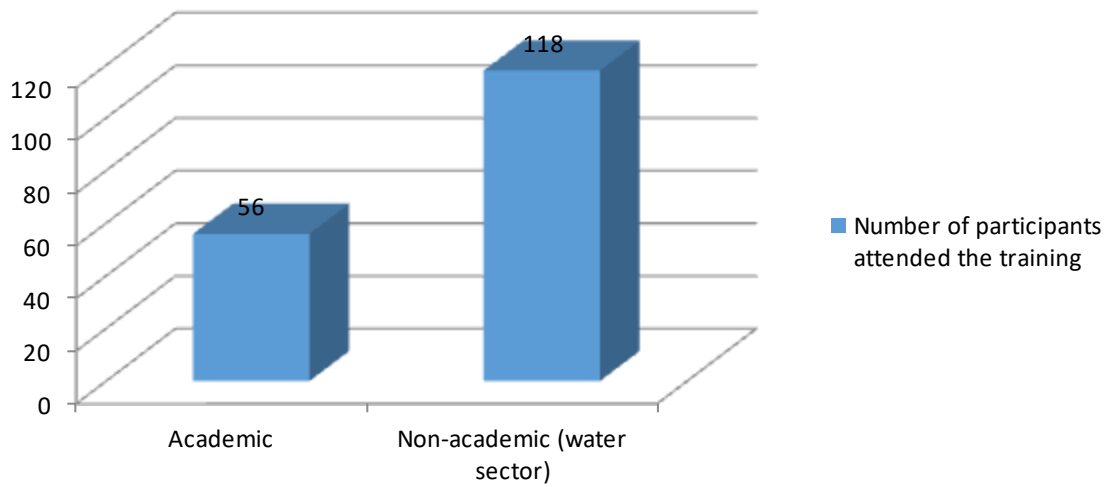

In total 174 participants attended the training (118 from the non-academic sector and 56 from the

academic sector) from 8th to 10th June 2021 or 85.71% of a total number of registered participants. In percentage, 68% of participants were from the water sector, while 32% of participants were from the academic sector.

### Number of participants attended the training

## Number of participants attended the training

### Companies divided into sectors

The academic sector:

- Akademija tehničko - vaspitačkih strukovnih studija
- University of Montenegro, Faculty of Civil Engineering
- University of Novi Sad, faculty of Technical Sciences
- University of Nis, Faculty of Civil Engineering and Architecture
- Dzemal Bijedic University of Mostar, Faculty of Civil Engineering
- University of Sarajevo, Faculty of Civil Engineering
- University of Sarajevo, Faculty of Agricultur
- Gradezen Institut Makedonija AD Skopje
- Gradezen fakultet Skopje
- Institut za vodoprivredu "Jaroslav Černi" AD, Beograd
- IPSA Institut
- Knjaževačka gimnazija
- University of Rijeka, Faculty of Civil Engineering

## The non-academic sector (water related sector):

- Vodovod i kanalizacija DOO Podgorica
- Alfahidroterm
- Greenbuilding Cluster
- Vodovod i kanalizacija DOO Danilovgrad
- Vodovod i kanalizacija DOO Bar
- E3 Consulting Podgorica
- Municipality of Mostar
- Public Water Management Company "Vode Vojvodine"
- Ministry of Foreign Trade and Economic Relations of Bosnia and Herzegovina
- Ministry of environment, Republic of Serbia
- Hidro - Konsult Skopje, Macedonia
- Hydro Control d.o.o
- ING-INVEST d.o.o.
- Javna Ustanova Zavod za javno zdravstvo Kantona Sarajevo
- Javna ustanova "Vode Srpske" Bijeljina
- JKP "Vodovod i kanalizacija" Subotica, Srbija
- JKP "Naissus" Niš
- JKP "Standard" Knjaževac
- JVP "SRBIJAVODE" BEOGRAD VPC "MORAVA" NIŠ
- Kanton Sarajevo-Ministarstvo privrede
- KJKP Vodovod i kanalizacija d.o.o. Sarajevo
- MONCORE DOO, Podgorica
- Nik Com d.o.o. Nikšić
- Municipality of Irig
- Municipality of Leposavić
- Municipality of Pljevlja
- Opštinsko veće Opštine Ub
- Phyto - BiH project
- Pizzarotti Montenegro & C. S.p.A.
- Pokrajinski sekretarijat za regionalni razvoj, medjuregionalna saradnja i lokalna samouprava
- Procon doo Podgorica
- Regulatorna agencija za energetiku i regulisane komunalne djelatnosti
- Republic Hydrometeorologica Service of Serbia
- Saraj inženjerig d.o.o. Sarajevo
- SENDO doo Sarajevo - preduzeće za projektovanje, inžinjering, konsalting i izgradnju
- UNDP BiH
- Unioninvest dd Sarajevo
- Vigoris Ecotech DOO
- VIK Podgorica
- Vodacom
- "Vodovod" a.d. BANJA LUKA
- Vodovod i kanalizacija Kotor
- Vodovod Mostar
- Zavod za vodoprivredu Bijeljina
- Zavod za vodoprivredu d.d. Sarajevo

## Evaluation of the event

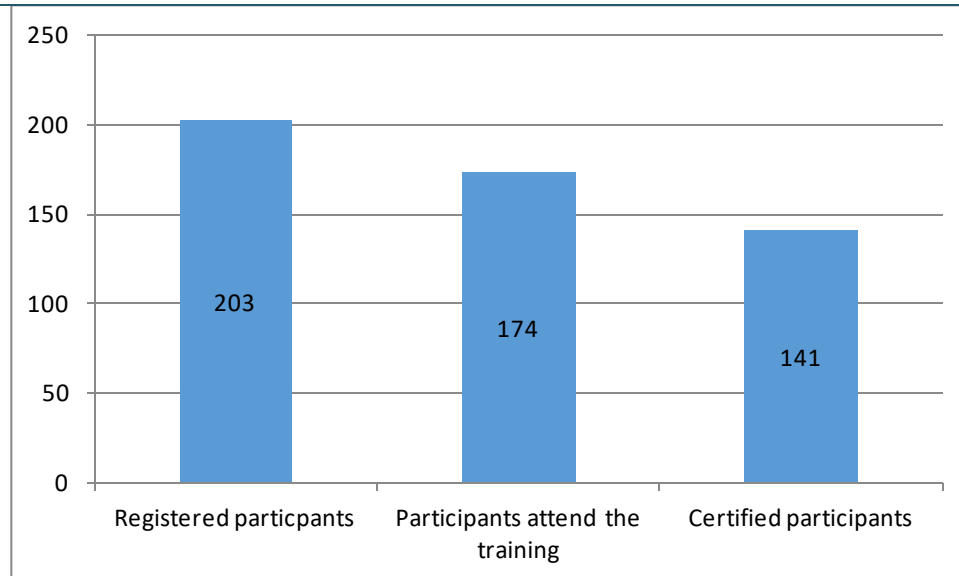

For the purpose of evaluating the training activities, the Google Form was created (<https://docs.google.com/forms/d/1LMZRCbC5u6lgQ9ypXwo7DbwcAju506yckeTBZvo3yo/edit>).

The evaluation list consisted of the following questions grouped into three categories:

- General organization of training
  - Relevance of the topic
  - Usefulness of the acquired knowledge
  - Rating of the methodology of working with participants
  - Rating of prepared training materials
  - Rating organization
  - Rating of working conditions
  - Rating interactivity in training
  - Rating transferability of acquired knowledge
  - Rating of satisfaction of participation in training
  - Assessing the fulfilment of expectations regarding training
  
- General participant expectations
  - Overall impression
  - Scope of material
  - Examples
  - Practical exercises
  - My expectations were met
  
- Evaluation of trainers
  - Quality of presentations
  - Quality of prepared material
  - Enabling active participation of participants

## Certification

For the certification of participants' attendance, the certificate was created. In total 141 participants were certified having in mind their attendance at the on-line training (minimum two days' attendance at the training) or 80.46% of the total number of participants or 68.96% of the total number of registered participants.

### Materials

All produced materials are freely available at the SWARM website <http://www.swarm.ni.ac.rs/activities?id=75>. Recordings are available at the SWARM YouTube channel:

First day

### Other personal remarks

The screenshot shows a Microsoft Teams meeting in progress. The main content is a presentation slide titled "Uvod" (Introduction). The slide text reads: "Prema direktivi WFD, osnovna klasifikacija površinska vodnih tela obuhvata, s jedne strane, prirodne kategorije reka, jezera, priobalnih morskih voda i prelaznu kategoriju izmedju kopnenih i priobalnih voda (na obali mora), a s druge strane, kategorije bitno izmenjenih vodnih tela i veštačkih vodnih tela. U tipologiji vodnih tela se koriste dva sistema ("A" i "B"). Kod sistema "A", prvi korak u identifikaciji vodnih tela se zasniva na podeli teritorije jedne države na ekoregione, pri čemu za svaki region postoji klasifikacija vodnih tela." The slide footer includes the text "Strengthening of master curricula in water resources management for the Western Balkans HEIs and stakeholders" and the website "www.swarm.ni.ac.rs". The meeting interface shows a participant list on the right with 12 presenters and 104 attendees. The bottom toolbar contains icons for various meeting functions.

The image shows two screenshots from a Zoom meeting titled "Trenin u oblasti upravljanja vodnim resursima".

**Top Screenshot (02:41:15):** The main slide is titled "Uvod" (Introduction). It contains the following text:
 

S obzirom na prikazane kriterijume klasifikacije i uslov homogenosti sredine, broj površinskih vodnih tela u jednom rečnom slivu može biti vrlo veliki. Pri tome treba imati u vidu da se prema WFD (aneks V), moraju uzeti u obzir svi vodotoci sa površinom sliva većom od 10 km<sup>2</sup>. Radi ilustracije ove problematike može se navesti primer teritorije Francuske, gde je u slivu Loire identifikovano 350, a u slivu Sene 500 površinskih vodnih tela. Međutim, u razradi primene WFD daju se preporuke za smanjenje ukupnog broja vodnih tela, grupisanjem entiteta po sličnosti.

 The footer of the slide reads: "Strengthening of master curricula in water resources management for the Western Balkans HEIs and stakeholders" and "www.swarm.ni.ac.rs".

**Bottom Screenshot (02:15:29):** The main slide is titled "Outcomes". It contains the following bullet points:
 

- Report on WB regional issues related to WRM
- Report on EU water policies and innovation and EU recommendations and legislation in water sector
- Report on master curricula related to WRM in EU and WB partner countries
- Workshop on innovative practices in the EU water sector: barriers and opportunities
- Report on innovative practices for WRM in EU

 The footer of the slide is identical to the top screenshot: "Strengthening of master curricula in water resources management for the Western Balkans HEIs and stakeholders" and "www.swarm.ni.ac.rs".

Both screenshots show a Zoom interface with a "Participants" list on the right side. The top screenshot lists 12 presenters and 104 attendees, while the bottom screenshot lists 9 presenters and 90 attendees. The interface also shows a "You're recording" warning and a "Privacy policy" link.

## Organisation details

|   |                       |
|---|-----------------------|
| Invitation sent to  | -                     |
| Date of training material release   | 10 June 2021          |
| Date of participants list's finalisation  | 10 June 2021          |
| Number of participants (according to the participants list)   | 174 (Microsoft Teams) |
| <b>Comments</b>   |                       |
| <p>* Excellent organization and excellent topics. I will be happy to attend the next training.</p> <p>* Everything was at a high level. Big compliments to the organizers and lecturers!</p> <p>*Excellent organisation and very good selection of relevant water-related topics.</p> <p>* To me, as a person who is not directly related to the field of architecture, all presentations were presented in an understandable way. Also, this three-day training allowed me to gain a good foundation for future studies - sustainable water and land management. Additionally, I think that this type of training is a great way to solve the problems we mentioned during the three-day training.</p> |                       |

### Problems encountered during the training preparation phase
