Strengthening of master curricula in water resources management
for the Western Balkans HEIs and stakeholders

www.swarm.ni.ac.rs

Description of the project

Co-funded by the
Erasmus+ Programme
of the European Union

- ELEMEND is designed to facilitate electrical engineering curricula in WBC to be competitive through teaching and training in smart grids and micro-grid technologies and electricity markets.
- ELEMEND's activities are organized in 7 work packages (WP) and workload was distributed among partners.

Strengthening of master curricula in water resources management
for the Western Balkans HEIs and stakeholders

www.swarm.ni.ac.rs

Project outcomes

- Through this project, 6 new e-learning courses at the BSC level (8 HEIs) and a new MSc programmes (60/120 ECTS) in the field of smart grids and electricity markets are developed and implemented at the WBC institutions
- 12 accredited new developed courses taught in English and in local languages at WB universities with aprox. 350 new enrolled students
- Development of ELEMEND open online platform (in English and local language) with virtual laboratories used by students and professors in WBC region, where e-courses are presented.

Strengthening of master curricula in water resources management for the Western Balkans HEIs and stakeholders

www.swarm.ni.ac.rs

Project outcomes

- New laboratories are installed at 9 HEIs that will be used in teaching process.
- An Internship programme is created and organised at each WBC university in cooperation with industry/SME sector.
- University - enterprise network is created within the project, around the core group of the ELEMEND industrial partners.

Strengthening of master curricula in water resources management for the Western Balkans HEIs and stakeholders

www.swarm.ni.ac.rs

Impact of the Project

- The new courses and Master's programme will engage new students and relevant target groups after the lifetime of the project as well as enhance public's awareness.
- It will also have an impact on the (non-technical) general public, as the end users of electricity will gradually be trained to interact with the market and / or the grid in real time.
- ICT tools, such as e-learning platforms and gamified content and applications, are expected to play a pivotal role in the public's behavioural modification and awareness.

Strengthening of master curricula in water resources management for the Western Balkans HEIs and stakeholders

www.swarm.ni.ac.rs

Impact of the Project

- Increased collaboration among HEIs in Partner & EU countries .
- Increased internationalization of the partner universities.
- Signed cooperation between the WBC HEIS and Industry representatives .
- The student projects carried out in ELEMEND labs will focus on real-life problems and are expected to attract the interest of relevant stakeholders.
